Gentlemen,

I would like to take this opportunity to thank and commend Mountain Movers on a clean and safe grading operation. From day one with Regan and Mike your company has been professional and quality oriented with particular care given to safety on and off site, clean up and in regards to your contractual obligations.

First and foremost, Joshua and Scott were on top of the day-to-day clean up and production schedule, always pushing to complete each aspect as quickly and professionally as possible. Joshua and Mike both pushed PPE and equipment safety at all times, for the most part there were no environmental issues and they worked hand in hand with Geocon and our Tribal inspectors professionally and in a timely manner. As you know we were required to use biologists to remediate our tree removal and again your crews and sub-contractor worked effortlessly with the inspectors and their requirements.

Regan was involved throughout the project and always available for any issues or concerns we had. Michael was a major part of your operation, coming by almost daily, resolving production issues and quality. Probably the most refreshing part about Michael is that his first item daily was safety and protocol of your operators. We are all guilty of looking the other way on some issues, but Michael was persistent about the operators, their PPE and use of the equipment seat belts.

Again, Thank You for a great job and experience working with a "professional company."

Respectfully,
