

Dear Mr. Njaa,

When I had a slope failure in my backyard just as the pandemic was beginning in 2020, I watched a handful of various professionals including general contractors & landscape contractors scratch their heads & say they would get back to me, never to be heard from again. Geo tech folks would offer their services for analysis/ reporting, but it would require subsequently seeking contractors to complete the work. Then, thankfully, I was referred to Mountain Movers which turned out to be experts in the field and truly a "one-stop shop." Eli came by and assured me they remedy this type of situation all the time. He described with supreme confidence & no hesitation in that first meeting how my issue would be addressed. In less than 48 hours, I had a written bid. In less than 2 weeks, my project had begun. Before the start, Eli brought Superintendent Efram by to discuss the game plan with me. I continued to be impressed by Eli, Efram, and the whole crew; Foreman James, Brian, Damian & Vlad. This team cares about being exceptional. They communicated clearly every step of the way & kept the job site neat & tidy. Daily clean-up even included raking my DG driveway. Classy! There were no surprises. Everything went just as promised. These guys are my heroes!
